DETAILED ACTION

1. This action is responsive to communications: Amendment filed 09/14/2004 to the original application filed 01/28/2003.
2. Claims 14-35 are currently pending in this application. Claims 14, 25, and 31 are independent claim.

Election/Restrictions

3. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 14-30, drawn to a method of extending a definition of a tag used in an electronic document, classified in class 715, subclass 513.
 - II. Claims 31-35, drawn to a method of interpreting an XML document on a server, classified in class 709, subclass 219.
4. The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as combination and subcombination. Invention in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because the subcombination is importing schema into the document instance. The subcombination has separate utility such as accessing schemas from servers.

5. Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II or Group III, restriction for examination purposes as indicated is proper.

6. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
